This application is in condition for allowance except for the following formal matters:

In the brief description of the drawing on page 5, the description "similar experimental results" for Figure 2 is vague. It appears that applicants are referring to the description of Figure 1. It is further unclear as to why the trends for the sets of graphs are different for the two figures. On page 23, applicants mention that the differing release rates of the dye OT between Figures 1 and 2 are due to differences in the micelles used for each figure. However, the compositions of the micelles does not appear to be disclosed.

The first sentence in the specification should be updated to indicate the patent numbers of the applications.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
